

Dear Parent,

NPE students have access to an exciting educational program, Splash Learn, to supplement their math learning at school and home.

While we do use Splash Learn during school hours, we will be giving additional assignments on Splash Learn that children can work on at home. It would be great if you can encourage your child to work on these assignments regularly. Your involvement will boost your child's math confidence and accelerate the pace of their math learning.

Children can access Splash Learn through a desktop computer (www.splashlearn.com) or the Splash Learn app on most devices. You can access your child's login by contacting your teacher, and it can be used for both desktop and mobile access. If you have any technical questions, you can reach out to the Splash Learn team at help@splashlearn.com.

We appreciate your partnership to help our children continue to strengthen their math skills.

Thank you,
NPE Teachers
