Introduction

The data provided below are used to monitor COVID-19 in Chester County and Delaware County. Data is updated once a week. All data, including historical data, is updated each time this report is published as additional data that becomes available through reporting and case investigations.

Vaccine Administration

Vaccine data will be updated on Monday, 02/01/2021.

Cumulative Incidence Rate per 100,000

Cumulative incidence rate is a public health measure that summarizes the number of new COVID-19 cases. The lower the incidence rate, the lower the number of new cases. This measure is calculated by dividing the total number of confirmed¹ cases by the population² for a specific time period, and is expressed as a rate per 100,000 people. The rate is calculated for 7 day periods beginning with the most current week as Week 1 and looking back three weeks in the tables below.

Chester County

7 Day Period	Positive Case Count	Incidence Rate per 100,000	Additional Data
Week 1 (most current)	850	161.91	Local Incidence Rates
Week 2	1,093	208.19	
Week 3	1,394	265.53	
Week 4	1,478	281.53	
Weeks 1-4 Average	1,203.75	229.29	

Delaware County

7 Day Period	Positive Case Count	Incidence Rate per 100,000	Additional Data
Week 1 (most current)	1,161	204.85	Local Incidence Rates
Week 2	1,144	201.85	
Week 3	1,477	260.61	
Week 4	1,539	271.55	
Weeks 1-4 Average	1,330.25	234.72	

¹ Confirmed cases are those confirmed through a laboratory test.

² Chester County Population = 524,989 | Delaware County Population = 566,747

Percent Positivity

Percent positivity is a public health measure that shows the percentage of all PCR COVID-19 tests performed that are positive. This measure is calculated by dividing the total number of positive PCR tests by the total number of all PCR tests (positives + negatives) for a specific time period, and is expressed as a percent. If individuals are tested multiple times, each test result is counted. The percent is calculated for 7 day periods beginning with the most current week as Week 1 and looking back three weeks in the tables below.

Chester County

7 Day Period	Positive PCR Tests Count	All PCR Tests Count	Percent PCR Positivity
Week 1 (most current)	999	14,093	7.09%
Week 2	1,250	14,925	8.38%
Week 3	1,562	15,492	10.08%
Week 4	1,600	14,310	11.18%
Total for All Weeks	5,411	58,820	9.20%

Delaware County

7 Day Period	Positive PCR Tests Count	All PCR Tests Count	Percent PCR Positivity
Week 1 (most current)	1,356	15,393	8.81%
Week 2	1,335	16,172	8.26%
Week 3	1,650	16,136	10.23%
Week 4	1,674	14,594	11.47%
Total for All Weeks	6,015	62,295	9.66%

Recommendations

COVID-19 spreads mainly through close contact from person to person, including between people who are physically near each other (within about 6 feet). People who are infected but do not show symptoms can also spread the virus to others. How easily a virus spreads from person to person can vary. Incidence rates and percent positivity are impacted by the activities individuals engage in that increase exposure risks. Individuals are encouraged to reduce their exposure risks by avoiding group activities, remaining home when not feeling well, and wearing a mask at all times. Over the past 7 days, the most common types of activities reported to the Chester County Health Department by individuals with COVID-19 included:

Chester County	Delaware County
<ul style="list-style-type: none"> • Have Close Contact With A Confirmed Or Probable Case Of COVID-19 Disease • Attend Or Work At A School (Pre-K To 12th Grade) 	<ul style="list-style-type: none"> • Have Close Contact With A Confirmed Or Probable Case Of COVID-19 Disease • Attend Or Work At A School (Pre-K To 12th Grade)
