June 10, 2019

Dear SHHS Parents/Guardians

During the 2018-2019 school year, Strath Haven High School began a 1:1 Chromebook initiative for all 9th grade students (Class of 2022). That initiative was highly successful a means of modernizing the learning experience for our students. It is with great pleasure today, that I write to inform you that beginning in the 2019-2020 school year, Strath Haven High School will be providing all students with a Chromebook as a part of our building wide 1:1 Chromebook Initiative.

The Chromebook initiative is a part of our larger building effort to modernize the learning experience for all students. This year, using these devices as a part of the instructional program has given our students and teachers the opportunity to engage with our curriculum in truly unique ways. These devices provided our students with more seamless access to Google Classroom and the Google Educational Suite and allowed for increased collaboration both in and out of the classroom. I am glad to now be able to extend these benefits to all of our students.

These devices will be available for pickup beginning in August and I will provide a specific schedule of those dates and times later this summer as a part of the return to school mailing in early August.

Please contact me if you have any questions regarding this new initiative.

Sincerely,

Kristopher Brown, Ed.D.
Principal
Strath Haven High School
